

**Look out, Gateway!**

**Oops. Too slow.**

**Cyrix®**  
Advancing the Standards

Quick! Turn for more details! →

# Cyrix introduces the world's **FASTEST** Windows<sup>®</sup> 95 computer.

**From the inside out, it's flat-out faster!** Cyrix PCs are so fast, Gateway may not know what hit them. But you will. Because now you can get a computer that puts more power at your fingertips.

**It's easy when you have the 6x86™ advantage!** Only Cyrix can offer you this much value. That's because we have a huge advantage over other computer companies. You see, we've been a major player in the processor industry for years. And now we're leading the herd with the Cyrix 6x86 computer. So while the competition is still slapping together PCs around Intel's processors, we're building them a whole new way.

At Cyrix, our worldwide engineering groups design Cyrix PCs from the inside-out – starting with our world-class superscalar 6x86 processor (or the “Pentium® killer”, as the press is nicknaming it). It was specifically created to push performance to the max and run your software faster than ever.

You get powerful 6x86 architectural features you just can't get with Pentium, including: *superpipelining* which minimizes PC inactivity and keeps data flowing faster; *multi-branch prediction* which predicts the next instructions needed for added time savings; and *out-of-order completion* so your computer can run software programs in the most logical order, and provide the processor efficiency and power you require.

We squeeze every millisecond of performance out of the 6x86's dazzling sixth-generation architecture until it personifies power. And leaves the competition out in the field (looking for more hay, we might add)! For you, that means operating your software applications faster than ever. In a world where every second counts, that's a big plus!

**Industry-standard compatibility assured!** Count on Cyrix processors to deliver x86-compatibility for smooth-running software. Building on a legacy of proven performance, they're already hard at work in over six million PCs. Running applications under Windows 95, Windows NT™, Windows®, OS/2®, MS-DOS®, NetWare®, Solaris™ and UNIX®.

Order your own Cyrix powerhouse today!

**Call 1-800-340-7811 Fax 1-800-340-7463**

For warranty details and more information,  
call us or visit our web site at <http://www.cyrix.com>

**Hard-hitting power!** Get ready for unprecedented PC power, able to drive the latest Windows 95 applications at maximum performance. Breeze through complex spreadsheets and multi-layered databases. Work on multiple programs simultaneously without sacrificing one ounce of performance. And get ready to land places you've only dreamed about as you take the Internet and the world of multimedia by storm.

And if that's not enough, Cyrix has the horsepower you need to tame even the most demanding applications (like desktop publishing and CAD) and ride your way to success, today and tomorrow.

## Cyrix PCs don't just perform. They **OUTPERFORM.**

### The Cyrix Performance Advantage

*Cyrix vs. the Pentium Competition*  
**Winstone® 96**

<b>Cyrix 6x86-P166 PC</b> (16MB, EIDE HD)	<b>79.0</b>
Gateway P5-166XL <sup>1</sup>	77.6
Dell® Dimension XPS P166c <sup>2</sup>	74.9

<sup>1</sup> Windows Sources Magazine, February 1996 <sup>2</sup> PC Magazine, January 23, 1996

"The most viable Pentium alternative yet."  
*PC World, February 1996*

*Faster than the Pentium® Pro 200!*  
**Winstone 96**

<b>Cyrix 6x86-P166 PC</b> (32MB, SCSI HD)	<b>84.3</b>
DEC Celebris™ XL 6200 with 200MHz Pentium Pro <sup>3</sup>	80.5

<sup>3</sup> PC Week, January 8, 1996

"...the [Cyrix] 6x86 is optimized for 16- and 32-bit Windows – meaning the [Cyrix] P166<sup>+</sup> offers better performance than any other processor on the mainstream desktop."  
*PC Magazine, ZD Net, Trends Online – February 16, 1996*

# When it comes to getting the most for y

21" high-res color monitor available.

## **Cyrix 6x86-P166 PC**

**\$3,349** Business lease for only \$116 a month

- ◆ Cyrix 6x86-P166+ Processor
- ◆ 6X EIDE CD-ROM drive
- ◆ 3.5" floppy drive
- ◆ 256K synchronous pipeline burst cache
- ◆ Sound Blaster AWE32™ wavetable sound
- ◆ Minitower or Desktop
- ◆ 16MB 60ns EDO DRAM (128MB max)
- ◆ Cambridge SoundWorks™ MultiMedia speaker system
- ◆ 104-key keyboard, two-button Mouse
- ◆ 2.1GB EIDE hard drive (10.5ms)
- ◆ 28.8 Fax/Modem/Telephone Answering Device
- ◆ MS Windows 95 Pre-loaded
- ◆ Matrox® MGA™ Millennium video, 2MB WRAM
- ◆ 17", 1280NI, .27mm monitor
- ◆ 3-Year Limited system Warranty\*

The **Cyrix 6x86-P166 PC** is also available with these upgrades:

- ◆ 32MB EDO DRAM
  - ◆ 4.2GB Fast SCSI-2 hard drive
  - ◆ Adaptec® Ultra SCSI Controller
- Only \$5,199**

Get up to speed with Cyrix Computers!

**Call today! 1-800-340-7811 Fax 1-800-340-7463**

For warranty details and more information,  
call us or visit our web site at <http://www.cyrix.com>

# For your money, we won't steer you wrong.

## Cyrix 6x86-P133 PC

Look here to 'spot' the best PC value around.

**\$2,399** Business lease for only \$85 a month

- ◆ Cyrix 6x86-P133+ Processor
- ◆ 256K synchronous pipeline burst cache
- ◆ 16MB 60ns EDO DRAM (128MB max)
- ◆ 1.6GB EIDE hard drive (10.5ms)
- ◆ 64-bit PCI video, 2MB EDO DRAM
- ◆ 6X EIDE CD-ROM drive
- ◆ Sound Blaster® 16-bit stereo sound
- ◆ Labtec LCS-1021 stereo speakers
- ◆ 28.8 Fax/Modem/Telephone Answering Device
- ◆ 15", 1280NI, .28mm monitor (System shown with optional 17" monitor.)
- ◆ 3.5" floppy drive
- ◆ Minitower or Desktop
- ◆ 104-key keyboard, two-button Mouse
- ◆ MS Windows 95 Pre-loaded
- ◆ 3-Year Limited system Warranty\*

As of 2/28/96, the Cyrix 6x86-P133 PC has not been approved by the Federal Communications Commission. This device is not, and may not be, offered for sale or lease, or sold or leased until the approval of the FCC has been obtained.

## Cyrix 6x86-P150 PC

Another reason why the grass is always greener with Cyrix.

**\$2,849** Business lease for only \$101 a month

- ◆ Cyrix 6x86-P150+ Processor
- ◆ 256K synchronous pipeline burst cache
- ◆ 16MB 60ns EDO DRAM (128MB max)
- ◆ 2.1GB EIDE hard drive (10.5ms)
- ◆ Matrox MGA Millennium video, 2MB WRAM
- ◆ 6X EIDE CD-ROM drive
- ◆ Sound Blaster AWE32 wavetable sound
- ◆ Cambridge SoundWorks MultiMedia speaker system
- ◆ 28.8 Fax/Modem/ Telephone Answering Device
- ◆ 15", 1280NI, .28mm monitor (System shown with optional 17" monitor.)
- ◆ 3.5" floppy drive
- ◆ Minitower or Desktop
- ◆ 104-key keyboard, two-button Mouse
- ◆ MS Windows 95 Pre-loaded
- ◆ 3-Year Limited system Warranty\*

Order risk-free! 30-day, no-hassle, money-back guarantee.

# We only have room for the best components.

Due to the fact that our engineers created the 6x86 processor at the heart of Cyrix PCs, Cyrix is uniquely positioned to optimize the entire system for the demanding needs of power users like you. We integrate the components best suited for our PCs and we use nothing but the cream of the crop.

With Cyrix, you'll optimize your PC performance with technically advanced EDO DRAM and synchronous pipeline burst cache. You'll witness sharper, more pronounced images and the ultimate in computer graphics thanks to WRAM video RAM. Take advantage of 16-bit wavetable sound to power your stereo speaker system. Set the stage for spellbinding multimedia with a 6X EIDE CD-ROM. Take your never-ending storage needs to new heights with a whopping 4.2GB SCSI hard drive. Sit back and relax with reliable 3.5" floppy drives and speedy 28.8 Supra Fax/Modems, complete with innovative Telephone Answering Device (perfect for the home office). And watch the performance of your life on your high-res 15", 17" or 21" color monitor. Sound good? It only gets better.

We relentlessly test each component with one another in the Cyrix Test Labs for seamless system-wide integration. Should we come across one that's not up to speed, we do the right thing: put it out to pasture. In fact, our job's not done until all components are fine-tuned and compatible with each other. The result? A lean, mean, power machine. That, and many happy customers.

**Designed to grow with you.** You'll be happy for years to come. That's because all Cyrix PCs have built-in upgradeability so you can add components with the ease of the Windows 95 plug-and-play standard. What's more, all models feature PCI and ISA slots. And, they're equipped to handle today's and tomorrow's superfast CD-ROM and hard drives, with lots of room to expand.

# Here's what you get with the Cyrix 6x86 processor.

Architectural Features	6x86	Pentium
Full x86 Instruction Set Optimization	◆	
Superscalar	◆	◆
Superpipelined	◆	
Register Renaming	◆	
Data Dependency Removal	◆	
Multi-Branch Prediction	◆	
Speculative Execution	◆	
Out-of-Order Completion	◆	
80-Bit Floating Point Unit	◆	◆
16K Primary Cache	◆	◆

## And here's what it means.

**Superscalar** – super-fast dual pipelines that execute twice the number of instructions at once for faster processing.

**Superpipelining** – seven pipeline stages that minimize execution stalls and keep data flowing faster.

**Dynamic register renaming** – gives you 32 registers (you only get eight with Pentium) for instant data availability without waiting for main system memory access.

**Data dependency removal** – provides instruction results to both pipelines simultaneously, avoiding pipeline stalls.

**Multi-branch prediction** – boosts performance by predicting the next instructions needed.

**Speculative execution** – allows the pipelines to continuously execute instructions following a branch for faster processing.

**Out-of-order completion** – lets the faster instruction exit the pipeline out of order, saving processor time without disrupting program flow.

**80-Bit Floating Point Unit** – speculatively executes the floating point and integer instruction for precision performance.

**16K unified write-back cache** – stores the most recently used data and instructions for single-cycle, on-chip access.

# Get up to speed on Cyrix.

**Cyrix is different from most computer companies.** Over the years, we've focused a lot of energy on the heart of the computer – the processor. Company President and CEO Jerry Rogers (shown), received industry recognition for product leadership in the areas of digital signal processing and graphics prior to even co-founding Cyrix in 1988. (His innovative work resulted in 12 patents for chips and systems.) And now, Cyrix has more than six million Cyrix processor chips installed in PCs all over the world.

With international teams of engineers operating from state-of-the-art facilities across the globe, Cyrix delivers the ultimate in speed and performance. We are committed to developing the best PCs for both today and tomorrow. And, because the award-winning 6x86 chip that goes into our PCs is also a Cyrix, we know – and stand behind – every inch of our entire system. So you can be sure of getting the best of everything. You've gotta like that!

**You can rely on Cyrix!** We thoroughly test each system before it's shipped. However, should something go wrong – you're covered. You get a three-year limited warranty\*, along with one-year of on-site, next-business-day\* service.

You'll also enjoy toll-free technical support – 24 hours a day, seven days a week. And you can access our technical information through the Internet or CyrixFax (800-340-7532) any time ... all the time!

**Cyrix is your risk-free choice!** You can search 'til the cows come home and you won't find a better PC alternative. Search some more and you still won't find this much PC with this much value! But don't take our word for it. Order today and see for yourself. You'll receive a 30-day, no-hassle, money-back guarantee. It's that easy.

With Cyrix, you have nothing to lose. And everything to gain! Call now!

Your Cyrix I.D. number is 561S

0000166018

Get the ultimate in PC price/performance!
